Keerthana Gandhirajan

Junior Gen AI Engineer | Python | LLM & RAG | Agentic AI
Chennai, Tamil Nadu | +91 70107 21178 | keerthanagandhi1104@gmail.com
Portfolio | GitHub | LinkedIn

Summary

Junior Gen AI engineer building LLM, RAG, and agentic workflows in Python, including an IT operations agent (LangGraph, Claude API, MCP, subagents) and a RAG PDF chatbot (LangChain, embeddings, vector database). Pursuing an MCA, with a background in enterprise operations at Kyndryl. Nominated by management to Kyndryl's internal AI Agent OPS Specialist Skilling Program and working toward the IBM RAG and Agentic AI Professional Certification.

Selected Projects

IT Operations AI Agent | *Python, LangGraph, Claude API, MCP*

- Designed a graph-based LangGraph workflow on the Claude API that interprets an operations request and routes it to the right tool through tool calling.
- Exposed job-status checks and issue triage as MCP tools, giving the agent a standard interface for calling them.
- Used subagents to handle discrete workflow steps, keeping the orchestration logic separate from the individual tasks.

RAG PDF Chatbot | *Python, LangChain, Claude API, embeddings, vector database*

- Built the ingestion pipeline: PDF text extraction, chunking, embedding generation, and storage in a vector database.
- Implemented semantic retrieval of the relevant passages for each query and passed them to Claude through LangChain.
- Designed prompts that constrain answers to the retrieved document context, limiting unsupported responses.

One-Click Job Notification System | *Python, REST API, databases*

- Developed a Python REST API for real-time job alerts with filters for role, location, and keywords.
- Modeled job and user records in a database to match openings to each user's preferences and generate personalized recommendations.

Additional Projects

- *X Sentiment Analysis* (Python, NLP, X API): collected X posts on a topic, removed URLs, mentions, and noise, and classified each as positive, negative, or neutral.
- *Financial Tracking and Visualization* (Python, APIs): built interactive stock charts and an investment-tracking view from API data.

Technical Skills

Programming: Python, Java, SQL, object-oriented programming, data structures and algorithms

LLMs and Agents: Generative AI, LLMs, prompt engineering, Claude API, tool calling, multi-agent systems, subagents, MCP

RAG and Frameworks: RAG, document parsing, chunking, embeddings, semantic search, vector databases, LangChain, LangGraph

APIs and Tools: REST API design and integration, Git, GitHub, Docker, testing, debugging, documentation

Familiar with: LlamaIndex, CrewAI, AutoGen, FastAPI, Flask, Django, Streamlit, Gradio, MongoDB, Pinecone, FAISS, PyTorch, TensorFlow, scikit-learn, NLP

Experience

Kyndryl Jun 2025 – Present

Computer Operations Representative (Full-time, On-site)

- Monitor scheduled enterprise workloads and job status in Universal Automation Center (UAC); follow runbooks for delayed jobs and escalate issues to the right support team.
- Maintain the shift handover with workload status, open issues, and follow-ups.

Education

Bharathidasan University, Tiruchirappalli Jul 2025 – Present

Master of Computer Applications (MCA), expected Jul 2027

SASTRA, Thanjavur Sep 2022 – Jul 2025

Bachelor of Computer Applications (BCA)

Certifications and Development

- Meta Back-End Developer Professional Certificate, 2024 (Python, APIs, Django, databases, Git)
- AI at Kyndryl: Mainframe Modernization
- Kyndryl AI Agent OPS Specialist Skilling Program, internal (manager-nominated; in progress)
- IBM RAG and Agentic AI Professional Certification (in progress)
